METHOD FOR PROVIDING A REVERSE STAR SCHEMA DATA MODEL

ABSTRACT OF THE DISCLOSURE

According to the invention, techniques for organizing information from systems in a data warehousing environment are provided. In an exemplary embodiment, the invention provides a method for analyzing data from one or more data sources of an enterprise. The method provides a meta-model based technique for modeling the enterprise data. The enterprise is typically a business activity, but can also be other loci of human activity. Embodiments according to the invention can translate data from a variety of sources to particular database schema in order to provide organization to a data warehousing environment.
